

SOFTWARE DEVELOPMENT PROPOSAL

Student Management System (SMS) & Learning Management System (LMS) Upgrade

Prepared For: *[Central Global University]*

Technology: CodeIgniter + MySQL

1. Project Overview

The objective of this project is to upgrade the existing Student Management System into a complete, secure, and scalable **AI-enabled Student Management System (SMS) and Learning Management System (LMS)**.

The upgraded platform will manage the complete student lifecycle, including online admission, document verification, fee payment, course delivery, assignment management, examination, certification, and automated communication.

The proposed solution will be developed on the client's existing **CodeIgniter + MySQL** platform while preserving the current database structure and existing functionalities wherever applicable.

2. Existing Modules (Already Available)

The following modules are already available in the current application and will remain functional after the upgrade:

Master Management

- Course Management
- Subject Management

Student Management

- Student Records
- Student Profile
- Student ID Card

Academic Management

- Books
- Syllabus
- Examination PDFs
- Exam Submission
- Result Management

Student Portal

- Student Dashboard
 - Download Study Material
 - Upload Examination PDF
 - View Results
-

3. Proposed Scope of Work

Module 1 – Student Registration & Authentication

- Online Student Registration
 - Secure Login
 - Password Creation via Email
 - Forgot Password
 - Profile Management
 - Account Security
-

Module 2 – Online Admission System

- Online Application Form
 - Personal Information
 - Academic Details
 - Course Selection
 - Document Upload
 - Application Submission
 - Email Acknowledgement
-

Module 3 – Application Verification

- Application Review

- Document Verification
 - Approve / Reject Applications
 - Admin Remarks
 - Status Tracking
-

Module 4 – Admission Management

- Automatic Admission Letter Generation (PDF)
 - Admission Letter Email
 - Fee Calculation
 - Secure Payment Link Generation
-

Module 5 – Student Dashboard Enhancement

- Profile Management
 - Application Status
 - Document Repository
 - Payment History
 - Course Progress
 - Assignment Status
 - Certificate Section
-

Module 6 – Payment Management

- PayPal Payment Integration
 - Payment Verification
 - Transaction History
 - Invoice Generation
 - Receipt Generation
-

Module 7 – Course Access Management

- Payment-based Course Access
 - Year-wise Access Control
 - Semester-wise Access
 - Learning Progress Tracking
-

Module 8 – Learning Management System

- Course Description
 - Video Lectures
 - Study Material
 - Downloadable Resources
 - Learning Progress
-

Module 9 – Assignment Management

Admin

- Upload Assignments
- Download Student Submission
- Review Assignment
- Marks
- Feedback

Student

- Upload Assignment
 - View Feedback
 - Assignment History
-

Module 10 – Examination & Result Enhancement

- Student Submission Review
 - Marks Entry
 - Result Publishing
 - Student Result Dashboard
-

Module 11 – Certificate Management

- Digital Degree Certificate
- Digital Transcript
- PDF Generation
- Certificate Download
- Physical Certificate Request
- Courier Tracking

Module 12 – Email Automation

Automatic email notifications for:

- Registration
 - Password Creation
 - Application Submission
 - Approval
 - Admission Letter
 - Payment Confirmation
 - Course Activation
 - Assignment Updates
 - Certificate Issuance
-

Module 13 – Advanced Admin Panel

- Dashboard Analytics
 - Student Management
 - Admission Management
 - Course Management
 - Payment Management
 - Assignment Management
 - Certificate Management
 - Reports
 - Export Data
 - Email Logs
-

Module 14 – AI Features (*Optional Upgrade*)

- AI Student Assistant
 - AI Chatbot
 - AI Lesson Explanation
 - AI Learning Support
 - AI Class
-
